1.Introduction:

Belstar Microfinance Ltd. (BML), through its credit and credit-plus support services, aims to financially empower unserved and underserved women and help them build and manage their sustainable livelihoods. BIFPL believes that customer is the central point of its activities and providing efficient customer service is essential not only to increase its outreach to newer clients, but also to retain existing clients for sustained business growth. Customer has the right to be heard. Customer complaints constitute an important *Voice of Customer*. Customer Grievance Redressal Mechanism (CGRM) is recognized as an important tool to make a stronger connect with customers to address their queries, concerns and complaints and get insights into their needs, requirements and expectations. This, inter alia, will help BIFPL to improve its processes, services and internal controls.

The Fair Practice Code of RBI, as outlined in its Master Direction-NBFC-Systemically Important Non-Deposit taking Company and Deposit taking Company- PD.008 / 03.10.119 / 2016-17 dt 01-09-2016 (updated as on 31.05.2018), mandates the Board of the Company to lay down an appropriate grievance redressal mechanism within the organization and to review its functioning periodically. Vide its email dt 15th October 2018, Micro Finance Institutions Network (MFIN) has also provided a guidance note on Customer Grievance Redressal Mechanism (CGRM).

2. Objectives:

The basic objective of the CGRM is to put in place a convenient, simple, transparent and effective system for speedy and efficient resolution of individual customer complaints and minimise instances of customer dissatisfactions. Additionally, it envisions (i) to protect customers against fraud or other unethical practices by educating them about the alternative escalation mechanisms within and outside the Company, for resolution of their issues if they are not satisfied with the Company's response; (iii) to consistently assess the impact of services in order to enhance competencies and serve clients better and (iv) to orient employees for consistently superior service behaviour.

3. Underlying Principles:

This CGRM policy is based on the client protection principles that (i) the Company will treat all the complaints efficiently and fairly as they can otherwise damage the Company's reputation; (ii) Complaints raised by the clients must be dealt with courtesy and in time; (iii) All clients are fully informed of the avenues

to escalate their complaints and (iv) the employees will work in good faith and without prejudice to the interests of the client.

4. Main Reasons for client's Complaints /Grievances

(i) **Employee Attitude related**- Such complaints be handled courteously, sympathetically and above all swiftly. Undesirable behaviour with customers be treated at zero tolerance level and immediate action is to be taken. It is to be emphasised that an open mind and a smile on the face of our employees will be able to win the customer's confidence and sort out many a complaint.

(ii) **Transactions / Operations related**- Such complaints arise due to inadequacy, at times, of the services made available to the clients or gaps in standards of services planned by the Company as per internal process and actual services rendered. Primarily Branch is responsible for the resolution of complaints/grievances relating to transactions / operations. Branch would be responsible for ensuring rectification of entry / transaction or satisfaction of customers. In case, it is not getting resolved at branch level, they can refer the case to Grievance Redressal Officer (GRO) at Head Office for guidance/resolution. It is the foremost duty of the branch to see that the complaint is resolved to the customer's satisfaction and if he/she is not satisfied, then to provide him/her with alternative avenues to escalate the issue.

5. Framework:

This CGRM Policy framework broadly consists of the following:

Such audit will cover all elements related to CGRM such as adherence to policy, employee awareness of CGRM, customer's orientation on CGRM (trainings, disclosure, awareness) and processing of complaints. In processing of complaints, audit should check if all complaints are appropriately registered, handled and resolved, adherence to TAT, degree of satisfaction with the resolution provided as reported by customers and flag the lapses.

5.5.3. Reporting:
